

Controlled Release of Orally Delivered Dosage Forms

Reckitt is looking to identify drug delivery systems allowing for the either prolonged sustained release of common active pharmaceutical ingredients (APIs), or sustained release when presented in a liquid dosage form. This campaign is focused on over the counter (OTC) medications focused on the alleviation of pain, cough, cold and flu, sore throat and gastrointestinal (GI) relief utilising oral liquid or easy to swallow oral solid dosage forms.

Approaches of Interest

- Application of technology or development of drug delivery systems to enable prolonged sustained release of APIs relevant to pain, cough, cold & flu, sore throat and GI relief categories
- Application of technology or development of drug delivery systems to enable sustained release of APIs relevant to pain, cough, cold & flu, sore throat and GI relief categories, presented to the patient in oral liquid or easy to swallow oral solid dosage forms
- Approaches prolonging the drug's GI transit time are of interest

Stage of Development

- Any approaches should have some form of validation, with supporting data in a biorelevant environment
- Validations moving from *in vitro* data to *in vivo* data is of the highest interest
- *In vitro* and *ex vivo* validations are also of interest

Submission Information

- Submission of one page, 200-300 word briefs are encouraged
- In submitting to this campaign, you confirm that your submission contains only non-confidential information

Opportunity for Collaboration

Reckitt is open to a range of collaboration opportunities, with the most appropriate outcome being decided on a case by case basis. Example outcomes include licensing assets, project/PhD funding, and research collaborations.

Opportunities sought

-  Technologies
-  Academics and expertise
-  Centres of excellence
-  Research projects
-  Spinout companies

Submissions

Please submit relevant, non-confidential opportunities online via: discover.in-part.com

Deadline: **19th July 2021 - 10:59 pm GMT**
