

## Novel Therapeutics for Common Skin Conditions

STADA Thornton and Ross is seeking opportunities that help better understand, prevent and treat common skin conditions. Specifically, the team is interested in novel therapeutics that target conditions such as **eczema, psoriasis, keratosis pilaris, acne, rosacea and seborrheic dermatitis**.

### Approaches of Interest:

- Novel insights into these common skin conditions such as identifying **new targets or therapeutic mechanisms**
- Opportunities that target or modify the **skin microbiome** are of interest
- Novel approaches to **relieve the symptoms, treat and prevent** common skin conditions
  - New application/understanding/repurposing of existing compounds
  - New combinations of active(s)
  - Formulatory approaches to deliver improved efficacy of existing products/therapies
  - Delivery routes – device/formulated product combinations
- New approaches to **assess and validate product efficacy**

### Out of Scope:

Infectious skin disorders such as impetigo.

### Developmental Stages of Interest:

Opportunities at all stages of development will be considered, with those being close to a finished product of highest interest.

### Submission Information

Submission of one-page, 200–300-word briefs is encouraged, along with any optional supplementary information e.g. relevant publications. In submitting to this campaign, you confirm that your submission contains only non-confidential information. Please be aware that there are some jurisdictional restrictions for this campaign, for a full list of restrictions, please click [here](#).

### Opportunity for Collaboration

Our client is open to a range of collaboration opportunities, with the most appropriate outcome being decided on a case-by-case basis. Example outcomes include licensing assets, project/PhD funding, and research collaborations.

#### Opportunities sought

-  Biotech assets
-  Spinout companies
-  Research projects
-  Centres of excellence
-  Academics and expertise
-  Technologies

#### Submissions
